

SYSTEM AND METHOD OF ASSOCIATING EVENTS WITH REQUESTS

ABSTRACT

[0060] Embodiments of the present invention can associate events, including non page events, such as the generation of dynamic content, with HTTP requests. One embodiment of the present invention can include receiving a set of HTTP request data including a request time stamp for each HTTP request in a set of HTTP requests, receiving a set of event data including an event time stamp for each event in a set of events and associating each event from the set of events with a previous HTTP request from the set of HTTP requests based on the event time stamps and request time stamps. Each event can be associated with previous HTTP request closest in time.
